DETAILED OFFICE ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing or responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers, which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

1. Claims 5, 8, 17, and 21 have been amended for further examination. Claims 25-35 have been added. Claims 1, 2, 14, 15 and 20 have been canceled.

Allowable Subject Matter

2. Claims 3-13, 16-19, 21-35 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: No prior art of record discloses or fairly suggest a pivotable collecting device

comprising: a supporting edge for supporting a sheet fold; two supporting sides converging at the supporting edge; a bottom side, wherein the supporting edge, two supporting sides and bottom sides enclose a volume; a means for pivoting the supporting edge and supporting sides about a first axis to receive the folded sheet, wherein the first axis is between the two supporting sides and positioned within the volume; and a collecting drive; further comprising wherein the collecting drive rotates based on at least a biasing element and contact between the collecting drive and a redirection area. And a method of transferring a folded sheet of material comprising steps of: receiving a first portion of sheet material on a first supporting side of the collecting device, wherein the collecting device pivots in a second direction to receive the first portion of the folded sheet; supporting a fold on a supporting edge of the collecting device; pivoting the pivotable collecting device in a first direction such that a second side of the collecting device receives a second portion of the folded sheet; and including all of the other limitations of the independent claims.

Hansch is the closest reference to disclose a pivotable collecting device. However, Hansch does not disclose a pivotable collecting device consisting of two supporting sides and a bottom, wherein the pivoting axis is between the two supporting sides and positioned within the volume.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Trovinger ('151), Trovinger ('436) and Meier disclose similar collecting devices.
